

Preliminary amendment to submitted application number, 10/775,641.

Specification to amendment;

This amendment to the above mentioned application utilizes the same concept of the invention, however expanding the use of the invention to include the same type products mentioned in the application, however being dispensed from a flat packaging envelope, such as wet wipes, tissues or standard product roll dispensing type platform found in such products as garbage bags or paper towels and toilet paper. Please add this amendment to begin after the final paragraph on page 2 of this application. Please see the additional photos substituted in place of drawings with detailed specification descriptions.

Figure 1. (Preliminary amendment)

This photo shows a typical flat envelope package of wet wipes.

Figure 2. (Preliminary amendment)

This photo shows the wet wipes envelope opened and ready to dispense the product. The problem in this current form of packaging is the consumer having to find and extract the leading edge of the product and begin dispensing the product. In the current form of packaging the consumer must dig into the product to find the edge of the sheet to begin dispensing the product.
